

## Care & Cleaning

Anupam® sink is made from the finest nickel bearing stainless steel. Anupam® sink is solid stainless steel and with proper care and maintenance, will give you a lifetime of service

- General cleaning: For everyday cleaning, mild soap or dish detergent is enough to prevent discoloration or dulling.
- Anupam® offers bottom grids and wire baskets to help protect the sink from scratches. Do not use a rubber mat on your stainless steel sink. Water and other residue gets trapped between the rubber and the sink, causing permanent staining overtime, if left untreated.
- Choose a non-abrasive cleaning tool: Sponges, soft cleaning pads, cloths, or bristle brushes are the best tools for scrubbing stainless steel.
- Wipe the sink dry. Water that evaporates on the sink surface can leave behind white spots, especially if you use hard water.
- Avoid storing open containers of household cleaners and chemicals containing chloride such as bleach, acid, drain cleaner and toilet bowl cleaner beneath the sink, vapour emission from the chlorides can cause corrosion and pitting to the exposed stainless steel and other metals. If any of these chemicals are used in the sink, rinse it immediately with plenty of clean water and dry thoroughly.
