AISI-316 Grade

Grade AISI-316 is the standard molybdenum-bearing grade, the molybdenum gives 316 better overall corrosion resistant properties, particularly higher resistance to pitting and corrosion in chloride environments. Available on Signature series sinks.

AISI-304 Grade

Anupam® sinks are made from premium-grade AISI-304 steel, a heavy-duty material, for the high level of durability and reliability.

1.5mm Thickness

The thickness of the stainless steel is probably the main point to check when buying a sink. The thicker the steel, the less susceptible it is to denting, bowing, noise, temperature changes and damage from hard knocks of pots and pans. Anupam® Prism Series sinks are available in 1.5mm thickness stainless steel.

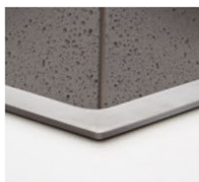

1.2mm Thickness

Thicker steel means a stronger sink. Signature Series is made with high grade 1.2mm thick AISI-316 stainless steel, this series is exceptionally long-lasting and dent-resistant.

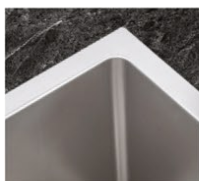

1.0mm Thickness

Anupam® uses 1mm thick steel for most of its series. This makes the sinks less vulnerable to denting and bending even after years of receiving knocks from utensils.

3mm Frame

3mm frame is used in Royale Series. The embodiment of thicker frame gives more strength and solid look. We assure a durable sink and a great look.

10mm Corner

Fresh, geometric design offers straight sidewalls and a flat bottom for a modern look and more usable space inside the sink. Items sit flat in the bottom of the sink, and glassware is less likely to tip over and break tight 10mm corners are easy to clean. Available on Prism and Royale Series sinks.

* Thickness relates to the characteristics of the raw materials. It usually varies depending on the quality of the sink and the depth of the bowl. The measurement can also vary from the drainer to the bowl due to the manufacturing process.

20mm Corner

Anupam® is the only manufacturer in India who is manufacturing deep drawn sinks in 20mm corner radius in Signature Series. It gives the sink geometric design, modern and aesthetic look and strength of deep draw technology.

Smart Drain™

This square shaped drain with its unique design helps in hassle free waste disposal. It keeps your drain clog free. Easy to clean and use it is a hygienic alternate to regular drain.

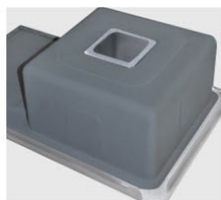

Perfect Drain™

The next generation drain, the Perfect Drain™ is the perfect solution to have a clog free drain. The dual anti-clog technology is used to remove waste in smarter way. The first bin helps to stop the large particles from moving down in the drain and clogging it, the second works for finer waste. Easy to clean this drain is a hygienic way of food disposal, and can be emptied out in a bin without any hassle.

Aqua Divide™

Anupam® sinks featuring Aqua Divide offer flexibility at the sink. They have a low centre wall that allows pan handles to extend over the centre. Use it as two separate bowls or fill the sink high with water to wash larger items, like baking sheets, across both bowls. Available on some models of PRISM Series sinks.

Undercoat with Sound Suppression Pad

Anupam® use special grade sound-suppression pads and undercoating. The main advantages of this special feature are that it absorbs sound, protects against condensation build-up inside kitchen cabinets and helps to maintain sink water temperature.

Care & Cleaning

Anupam® sink is made from the finest nickel bearing stainless steel. Anupam® sink is solid stainless steel and with proper care and maintenance, will give you a lifetime of service

- General cleaning: For everyday cleaning, mild soap or dish detergent is enough to prevent discoloration or dulling.
- Anupam® offers bottom grids and wire baskets to help protect the sink from scratches. Do not use a rubber mat on your stainless steel sink. Water and other residue gets trapped between the rubber and the sink, causing permanent staining overtime, if left untreated.
- Choose a non-abrasive cleaning tool: Sponges, soft cleaning pads, cloths, or bristle brushes are the best tools for scrubbing stainless steel.
- Wipe the sink dry. Water that evaporates on the sink surface can leave behind white spots, especially if you use hard water.
- Avoid storing open containers of household cleaners and chemicals containing chloride such as bleach, acid, drain cleaner and toilet bowl cleaner beneath the sink, vapour emission from the chlorides can cause corrosion and pitting to the exposed stainless steel and other metals. If any of these chemicals are used in the sink, rinse it immediately with plenty of clean water and dry thoroughly.
